

## Valve actuator for 0...10 V or 3-position control

The RVAZ4 series of valve actuators are easy to mount and have a clear position indication which shows the position of the actuator. The actuator has manual manoeuvring.

The RVAZ4 models are intended for use together with Regin's valve ranges ZTV/ZTR and ZMD. The RVAZ4L1 models can be used for different brands of valves in combination with the OVA-L1 adapter.
