"Designed specifically for use with multiple sizes of medical tubing"

VENTI PLUS TEST LUNG OVERVIEW

The **Venti Plus Test Lung** was designed for fast and easy ventilator circuit testing prior to clinical use. It comes complete with a latex-free silicone bag that simulates either an adult lung (1 liter models), or an infant lung (0.5 liter models). Both models include a turn and lock design that allows for easy removal of the bag for cleaning and decontamination. Every lung is calibrated for accuracy and validated for resistance and compliance within the application range.

PART NUMBERS

Venti Plus 1.0 Liter (Adult) R500P19

Venti Plus 0.5 Liter (Pediatric) R500P20

Specifications
